Professional Summary

Engineering graduate from IIT Kharagpur, skilled in full-stack systems, C++, Java, JavaScript and AI-ML-DL. Built secure and scalable applications through internships, projects, and hackathons, achieving measurable efficiency gains and improved accuracy.

Academic Qualifications

Year	Degree/Certificate	Institute	CPI/%
2025	B.Tech	Indian Institute of Technology, Kharagpur	8.13/10
2020	TSBIE(XII)	Narayana Junior College, Madhapur	97.9%
2018	BSEAP(X)	Viswabharati English Medium High School, Gudivada	10/10

Work Experience

- Software Internship at Midships Pvt Limited** (May '24 - July '24)
 - Automated retrieval of **3,000+** documents across **19** platforms enabling private **RAG** deployments and reducing manual data preparation time from hours to minutes for **enterprise** users while streamlining ingestion, chunking, embedding.
 - Configured **EC2** security groups and **IP** whitelisting to secure **LLM** demo endpoints for **20+** internal and client users, preventing unauthorized access and ensuring a controlled evaluation environment for enterprise model demonstrations.
 - Analyzed FIDO2 issues in Chinese Android SDKs, analyzing OS-level restrictions impacting **authentication** services.
 - Redesigned product pitch decks in **Figma**, creating professional presentations for product launches, improving clarity and stakeholder engagement.
- Full Stack Internship at IIT Kharagpur** (May '23 - July '23)

Mentor: Prof. Pabitra Mitra, Department of Computer Science and Engineering.

 - Built a scalable movie app with **React**, **Redux**, and Material UI, dynamically rendering 250+ movie cards from **APIs**.
 - Implemented advanced search and genre filters with Redux thunks, efficiently enabling **real-time** queries across 10+ genres.
 - Optimized API calls with reusable components, reducing requests by **30%** and improving data accuracy to **95%**.

Technical Skills

- Programming Languages:** C, C++, JavaScript, Java, Python, HTML, CSS
- Software and Libraries:** Bootstrap, Tailwind CSS, NodeJS, ReactJS, ExpressJS, MongoDB, Git, GitHub, Linux
- Other skills:** Data structures and Algorithms, ML, DL, Gen-AI, OOPS, CN, DBMS, OS

Key Projects

- Secure Role-Based Hospital Management Application — MERN** (Oct '25)
 - Implemented JWT authentication with role-based access control securing API endpoints and preventing unauthorized access.
 - Improved appointment booking **APIs** using schema validation, increasing data **accuracy** by **95%** across workflows.
 - Integrated **Cloudinary** media storage, offloading images from the **server** and reducing local compute **load** by **40%**.
 - Crafted an interactive hospital admin dashboard that enhanced operational efficiency by **60%** across various workflows.
- Custom Rate Limiter Middleware — Redis** (May '25)
 - Designed and implemented a **Redis-based** rate limiter capable of handling **500+** API requests/sec with high **efficiency**.
 - Enforced **fair API** usage with a Fixed Window algorithm, effectively reducing excessive and abusive traffic patterns.
 - Stress-tested with **10,000+** simulated requests, ensuring consistent and reliable **rate limiting** under heavy load.
 - Deployed **middleware** as a reusable service, enabling seamless **integration** across multiple APIs with minimal configuration.
- Gen AI with AWS for Blog Creator — GenAI** (Nov '24)
 - Built a serverless generative AI blog creator using API Gateway, AWS **Lambda**, and Amazon Bedrock for real-time queries.
 - Configured Lambda (Python 3.12) with **Boto3** and **Bedrock**, leveraging layers, environment variables, and error handling.
 - Integrated Amazon **S3** for **scalable storage**, saving timestamped outputs to enable efficient retrieval and versioning.
 - Achieved **65%** cost savings, **70%** lower latency compared to **EC2**-based API setups via optimized serverless infrastructure.

Achievements and Activities

- Secured **1st** place in a Data Science **Hackathon**, excelling in quizzes and final rounds as part of a 4-member team.
- Competed in Kaggle challenges, gaining hands-on experience with real-world datasets and advanced **ML** model applications.
- Completed **Full-stack** web development, **Data Structures and Algorithms** courses at GFG, ranking top 5 in the contests.
- Spearheaded the **analytical** approach that identified and addressed the three biggest challenges within the case study, resulting in a Gold-winning performance in the Inter-Hall **Case Study** Championship.
